PROFESSIONAL SUMMARY

Software engineer who turns manual business processes into working, production software and takes it from first requirement to daily use. Built and shipped a sales CRM used daily by three logistics sales desks, an AI customs-document service, and four live web apps, using React, Node.js, Python, REST APIs, PostgreSQL/Supabase, Docker and Vercel, plus Android apps in Kotlin. Currently Tech Head of an early-stage startup, managing production of its apps. Uses Claude Code daily, and reviews, tests and takes responsibility for every AI-generated change before it ships.

CORE SKILLS

Programming	JavaScript, Python, SQL, Kotlin, Dart, HTML5, CSS3
Front end	React, Vite, responsive component-based UI, REST API integration, forms and dashboards
Back end and APIs	Node.js, Express, Flask, FastAPI, REST APIs, authentication, role-based permissions, background jobs, caching
Databases	PostgreSQL, Supabase, Firebase, data modelling, migration, cleansing and de-duplication
Mobile	Android in Kotlin, Firebase back end, GPS and Bluetooth LE features, Dart
Integrations	Gemini API (AI document reading), Playwright automation, two-way Excel sync, third-party APIs
DevOps	Git/GitHub, GitHub Actions (CI/CD), Docker, Linux, Vercel, Grafana, Prometheus and ELK monitoring
AI-assisted dev	Claude Code, reviewing and testing all generated code, prompt engineering, local models with Ollama
Security	Authentication and role-based access control, input validation, audit trails, soft deletes, human review of AI output

EXPERIENCE

Tech Head (Founding Team), Cyphyx Present

Early-stage technology startup

- Lead the technical side of the founding team and manage production of the company's apps, from build through release.

Software Engineer Intern, Aries Global Logistics (AGL), Doha, Qatar May 2026 to Jul 2026

International logistics company with sales desks in Qatar, Dubai and MSC

- Turned three separate manual sales trackers into one full-stack web CRM (Python, Flask) with a live management dashboard, used daily by the Qatar, Dubai and MSC desks.
- Built a Node.js service that uses AI to read shipping documents for customs staff.
- Deployed, supported and improved both systems in daily production use, working directly from the needs of sales and operations staff.

IT Intern, Ncell (Axiata Group), Nepal Jun 2025 to Jul 2025

Largest private telecom operator in Nepal

- Built live Grafana dashboards, improved Prometheus alerting and ELK logging, and containerised log pipelines with Docker in a production network.

Web Development Intern, TS Qatar, Doha, Qatar Jun 2024 to Jul 2024

- Internship covering HTML, CSS, JavaScript, SASS and React.

PROJECTS

Live: hasbi-website-beta.vercel.app | coachquest.trialpath.org | career-assessment-pay.vercel.app | company-forms-nine.vercel.app

Sales CRM and Management Dashboard, Aries Global Logistics Python, Flask, REST

- Merged three trackers (~2,540 records) into one 36-column database, fixing mismatched columns and removing duplicates; two-way Excel sync let staff keep their spreadsheets.
- Full sales cycle: lead capture, stage tracking, follow-up reminders, exportable reports and a live dashboard.
- Named-user logins, role-based permissions, validation on every entry, soft deletes and a field-level audit trail. Planned the upgrade to FastAPI and PostgreSQL.

AI Customs Document Service, Aries Global Logistics Node.js, Gemini API

- Reads shipping documents for customs staff, with a person reviewing every result.

Web Apps: Hasbi Family Platform, CoachQuest, Career Assessment, Company Forms React, Supabase, Vercel

- Hasbi: designed, built and launched a full-stack web app with a family tree, cloud photo gallery and secure role-based access.
- CoachQuest, Career Assessment and Company Forms: built and deployed web apps in active use.

Android Apps: SARS and WatchNav Kotlin, Firebase, Bluetooth LE

- SARS: reports stray animals for rescue, with GPS-tagged reports and a Firebase back end.
- WatchNav: sends phone navigation to a smartwatch over Bluetooth LE.

Large-Scale Data Pipeline, Final-Year Project Python, streaming, automated testing

- Streamed 0.76 TB through under 2 GB of disk with zero failures; wrote a parallel downloader 26x faster than a normal download.
- Seven automated checks caught four hidden bugs early; every result is logged with its exact code version. Model reached AUC 0.995 on CAMELYON16.

CERTIFICATIONS

Google AI Professional Certificate (Oct 2026), Google AI Essentials Specialization (Oct 2026), Google Analytics Certification, Dart Programming Certificate

LEADERSHIP

Web Development Head, FOSS Club, TKMCE; Executive Committee Member, Google Developer Group (GDG) and FOSS, TKMCE; School Leader, Rajagiri Public School, Doha (Leadership Honors)

EDUCATION

B.Tech, Computer Science and Engineering, TKM College of Engineering, Kollam (KTU) Expected 2027

LANGUAGES

English (fluent), Arabic (working proficiency), Malayalam (native), Hindi (fluent)
